Title: **Online Election System**

Description:

This project is beneficial for **Election Commission, Voters** as the can get to know the candidate background and choose wisely, and even for Candidate. This system can be useful for electing **political leaders, college head boy/girl, society chairman**, etc. The software system allows the Candidate to login in to their profiles and upload all their details including their previous milestone onto the system. We can create multiple elections at a time and voters will be able to select which election to vote in. We can add candidates with their details. After the election deadline is over, everyone will be able to view result of all elections. We can download election report having details of all the candidates and their number of votes.
